

**Dr. Ken W. Richards**

Dr. Ken Richards is the manager of Canada's national program for the genetic resources of crops, farm animals and agricultural micro-organisms, at Agriculture and Agri-Food Canada. Dr. Richards has been with Agriculture and Agri-Food Canada for 35 years at Lethbridge and Saskatoon. He is responsible for: development of management practices for native bees for pollination of forage legume crops; Section Head Crop Sciences; managing, directing, policy development and coordinating Canada's genetic resources program for plant, animal and microbial genetic resource encompassing all basic functions of gene banks (acquisition, distribution, maintenance, regeneration, characterization and evaluation, and documentation).
